SUBJECT: Supply and Installation of UC - Unified Communication System

Description	Quantity	Unit Price	Amount RM
Unified Communication 1. All-in-One Video Conferencing Bar + Wall Mount Elevate your meeting rooms with a premium all-in-one video conferencing system designed for medium-to-large collaboration spaces. This intelligent video bar combines a motorized PTZ camera with 4K ultra-HD resolution and 15x zoom, six AI-powered beamforming microphones, and dual integrated speakers — all housed in a single, streamlined enclosure. Advanced AI technology automatically levels voice volumes, suppresses background noise, and intelligently frames active speakers in real time, ensuring every participant is seen and heard with clarity. Compatible with all leading UC platforms including Teams, Zoom, and Google Meet, the system is centrally managed via a cloud-based dashboard for effortless firmware updates and room health monitoring across your entire estate. The included professional wall mount delivers a clean, secure installation with optimal viewing angles and a cable-free aesthetic.	1.00 Units	19,900.00	RM 19,900.00

 Unified Communication Meeting Room Touch Controller Lot 69, Block F, Lazenda OG Warehouse Rancha Rancha, Labuan FT 87000, Malaysia East Contact: info@digitalinfotech.com.my Tel: +60-87-430305 Give every room a consistent, intuitive meeting experience with this 10.1" touch controller purpose-built for video conferencing environments. Participants can join scheduled meetings, share content, and adjust room settings with a single tap — eliminating confusion and reducing IT support calls. Powered entirely over Ethernet (PoE), the controller requires just one cable for both data and power, dramatically simplifying installation and reducing desk clutter. A built-in motion sensor wakes the display the moment someone enters, so the room is always ready. The anti-fingerprint oleophobic screen stays pristine under heavy daily use, while VESA-compatible mounting allows flexible table or wall placement. Fully compatible with Teams, Zoom, and RingCentral, and centrally managed alongside your conferencing hardware for configuration and updates at scale.	1.00 Units	6,500.00	RM 6,500.00
Cabling Works Professional-grade cabling is the invisible backbone that makes your conferencing investment perform at its best. This package covers the complete end-to-end structured cabling required to connect and power your video collaboration deployment — including Cat6/Cat6A Ethernet runs for PoE connectivity, HDMI and USB routing for display integration, cable containment through conduit and trunking, and neat termination at both ends. All cabling is installed to industry standards with proper labelling, testing, and certification to ensure reliable, interference-free signal delivery from day one. This eliminates guesswork, prevents future troubleshooting overhead, and delivers a clean, professional finish that reflects the quality of your meeting spaces.	1.00 Units	3,500.00	RM 3,500.00

digital infotech Lot 69, Block F, Lazenda OG Warehouse 100 Units Rancha Rancha, Labuan FT 87000, Malaysia East Contact: info@digitalinfotech.com.my Tel: +60-87-430305 Training Users Your Team Knows Exactly What to Do A well-equipped room only works when the people inside it feel confident using it Every user is walked through the full system — how to start a meeting, share a screen, bring in a remote participant, and manage the room controls. Hands-on. In the actual space. With real scenarios your team faces every day. No guesswork. No one quietly struggling while the meeting waits. No calls to IT for things that should take seconds. Your people leave the training ready to use the room, not just aware that it exists.		1,000.00	RM 1,000.00
